### Letter of Recommendation

To whom it may concern,

Born on 4 November 1908, Józef Rotblat is known to history as a distinguished physicist who decided to leave the Manhattan Project for ethical reasons, co-founded the Pugwash Conferences on Science and World Affairs, and received the Nobel Peace Prize in 1995. In Poland, the life of Józef Rotblat has still not been adequately researched, and few Poles are aware of his extraordinary accomplishments.

Having been personally acquainted with Professor Rotblat, I would like to support the endeavors of Tomasz Kostrzewa, Joanna Roszak, and Anna Marczak to honor the heritage of this remarkable scientist and humanitarian. I am confident that their professional experience and achievements in working with NGOs, academics, and business will ensure successful results in their initiatives to promote the memory of Józef Rotblat both in Poland and abroad.

Sincerely,

Lech Wałęsa  
President of Poland (1990 – 1995)  
Nobel Peace Prize Laureate (1983)
