

What is the solar energy potential in Colombia?

The potential of solar energy at a global level in Colombia is 4.5 kW h/m²/day and the area with an optimal solar resource is the Peninsula de la Guajira, with 6 kW h/m²/day of radiation, surpassing the world average of 3.9 kW h/m²/day. In the referenced link, there is an interactive map of the radiation indices in Colombia by IDEAM.

Does Colombia have solar power?

In the first renewable energy auction for the country, over 1 GW of wind power was awarded in 2019 for a 15-year power purchase agreement from 2022. Colombia has significant solar power resources because of its location in the equatorial zone, but the country sits in a complex region of the Andes where climatic conditions vary.

How can wind and solar energy be used in Colombia?

The expected large deployment of wind and solar resources in Colombia can be used to leverage creation of local employment, gender equality and benefits to local communities and Indigenous peoples. This will require strengthened policy frameworks to avoid negative effects on these areas.

What is the solar PV installed capacity in Colombia?

The solar PV installed capacity in the country has increased significantly in recent years. According to the International Renewable Energy Agency 2024, the installed solar PV capacity grew by more than twofold. The installed solar PV capacity in Colombia reached 676 MW in 2023.

Can solar power be used for residential self-sufficiency in Colombia?

Pre-feasibility of wind and solar systems for residential self-sufficiency in four urban locations of Colombia: implication of new incentives included in Law 1715 Renew. Energy, 130 (2019), pp. 1082 - 1091, 10.1016/j.renene.2018.06.087

Will solar and wind power increase in Colombia in 2022?

Colombia has world-class wind and solar energy potential and recent regulatory updates have enacted a robust framework of incentives. However, as of 2022, solar and wind have an operating installed capacity of just about 1.5% of the capacity mix. The next five years could see a sharp increase in solar and wind capacity.
