What's new in Energy Vault's Q3 results?

Image: Business Wire. Energy Vault has provided a dizzying variety of updates in its Q3 results, covering European battery storage, a green hydrogen system, a new CFO and its gravity-based energy storage deployments in the US and China. Having listed on the New York Stock Exchange earlier this year, the firm now publishes quarterly results.

What is a gravity energy storage system (GESS)?

Gravity energy storage systems (GESS) for grid support and renewable energy integration. G-VAULT(TM) is a family of gravity energy storage products that decouple power and energy while maintaining a high round-trip efficiency.

Why should you use gravity technology for energy storage?

Because increasing levels of renewable energy penetration will require 4 or more hours of storage capacity. Our proprietary gravity technology solutions offer long duration energy storage that is efficient and cost-effective, supports grid reliability, and enables renewable energy integration.

How many GWh does Energy Vault have?

Combined, all the plants have a cumulative storage capacity of 3.26 GWh and represent over \$1 billion in capital expenditures. China Tianying's Chairman, Mr. Yan Shengjun, confirmed that Energy Vault's innovative GESS facilities are meeting with strong demand in China for several reasons.

Who owns Energy Vault?
