

What is the energy storage project in Kosovo?

On the other hand, Neshati noted that "The Energy Storage Project is the largest energy project in Kosovo in decades and the most significant Battery Energy Storage System (BESS) project in Europe (MW per capita).".

Who is vas?

VAS designs, builds and maintains systems for the generation of heat and power in the range of 2 to 25 MW for private, industrial and public-sector customers. Since the company was founded in 1987, we have grown continuously, further refining and perfecting our knowledge regarding energy generation from biomass.

What is Kosovo's solar energy project?

The project is the largest solar energy investment in the district heating sector in the region and one of the largest solar power plants in Europe. As such, the project marks an historic moment on Kosovo's path towards a decarbonised energy system in line with the Paris Climate Agreement.

How will the EU support the energy transition in Kosovo?

The EU will support the energy transition and sustainable development of Kosovo through another 100-megawatt solar electricity project with the Kosovo Energy Cooperation." The EU's contribution to solar heating and electricity projects in Kosovo will total almost EUR56 million.

What does Vas do?

We plan, build and maintain systems in the range of 2 to 30 MW for private, industrial and public-sector customers. The VAS Group currently consists of six companies, all of which are united by one common goal: to constantly offer our customers more. We are technology leaders in environmental, combustion and process technology.

How much will Germany contribute to Kosovo's solar energy project?

The EU's contribution to solar heating and electricity projects in Kosovo will total almost EUR56 million. "Germany has supported Kosovo in its transition from coal to sustainable energy and decarbonisation in accordance with the objectives of the Green Agenda for the Western Balkans," said Germany's Deputy Ambassador to Kosovo Matthias Conrad.

The district heating project envisages the construction of a solar power plant that uses the sun's energy for central heating. It will also increase heating capacity by expanding the network by 50 MW. The innovative ...
