

Does Paraguay have electricity?

Paraguay is one of the few countries in Latin America that has maintained an integrated electrical system. Because of the dominance of hydroelectricity, tariffs (mostly residential) are remarkably below the averages for the region.

Who controls the electricity market in Paraguay?

The National Electricity Administration(Administración Nacional de Electricidad,ANDE),Paraguay's state-owned utility,controls the country's entire electricity market,including generation,transmission and distribution.

Why does Paraguay have a poor electricity system?

However,despite the abundance of resources,the Paraguayan electricity system faces difficulty due to the lack of investment in transmission and distribution networks. In addition,distribution losses are among the highest in the region.

Why are electricity tariffs so low in Paraguay?

Because of the dominance of hydroelectricity,tariffs (mostly residential) are remarkably below the averages for the region. However,despite the abundance of resources,the Paraguayan electricity system faces difficulty due to the lack of investment in transmission and distribution networks.

What is the National Electricity Administration (ANDE) program?

Since 2004,the National Electricity Administration (ANDE) has been carrying out a Program to Recover Distribution Worksunder the Self-Help System (Sistema de Autoayuda),which aims at the regularization of all the low and medium voltage distribution networks.

When did Paraguay become a hydroelectric company?

In April 1973,the governments of Paraguay and Brazil signed the Itaipu Treaty,by which it was decided to create a binational entity to hydroelectric use of the Paraná River. This entity was constituted by ANDE (Paraguay) and ELECTROBRAS (Brazil). US\$100 million were contributed in equal parts by both companies.
